

EXHIBIT B

U.S. PAT. NO. 6,470,345 v. Box

Box's content management and file sharing software accessible and offered via the Box Platform (*see* www.box.com/platform), including Business, Individual and Enterprise Editions (*see* www.box.com/for-enterprise; www.box.com/pricing-business; www.box.com/pricing-individual), which replace substrings in file and directory pathnames with tokens by reading a name string to be converted into a list of tokens, canonicalizing a current working directory and the name string to form a pathname that contains a plurality of substrings, parsing the pathname and replacing each substring with an associated token, and validating the parsed pathname containing the list of tokens (the "Accused Products").

Claim	Accused Products
1. A method for replacing substrings in file and directory pathnames with tokens in a computer-implemented file system, comprising the acts of:	<p>The Accused Products practice a method for replacing substrings in file and directory pathnames with tokens in a computer-implemented file system.</p> <p>For example, Box is a cloud-based service that offers computer-implemented storage and access for PCs and mobile devices. Using Box, the user can create folders and sub-folders identified with directory pathnames. The system is implemented on computers used to input, upload, store, download and share files.</p> <div data-bbox="470 782 1713 1141" style="border: 1px solid black; padding: 10px;"> <p><u>Box is a cloud service that offers storage, backup and sync options, and access for PCs, Macs and mobile devices of all kinds.</u></p> <p>While Box is a viable candidate for personal or business users, it's best suited for businesses that need to share and collaborate on files.</p> </div> <p>Source: https://www.business.com/reviews/box-cloud-storage-and-online-backup-services/</p>
